SR Telecom and MTI Announce Advanced Radio Design Agreement

Montreal, Canada and Taipei, Taiwan – April 10, 2006 - SR Telecom (TSX: SRX) and Microelectronics Technology Inc. (MTI) have today announced that they have entered an agreement for the co-design of advanced WiMAX access radio systems. MTI is the leading manufacturer of microwave communication equipment in Taiwan. The collaboration will commence immediately.

SR Telecom and MTI will further develop the advanced radio solutions for subscriber station and base station radio units for the **symmetry MX™** WiMAX product portfolio of SR Telecom.

“This partnership will enable the customers of SR Telecom to better address multiple market segments with a standardized WiMAX airlink, across different radio bands,” said Chaz Immendorf, Chief Technology Officer of SR Telecom.

“We are very pleased to enter into this agreement with SR Telecom. The combination of our significant depth in radio development and SR Telecom’s market leading technology in licensed OFDM deployments will provide for a strong partnership,” said Patrick Wang, Chairman and CEO of MTI.

“MTI is a long term, highly reliable partner of SR Telecom and has provided us with outstanding delivery and quality performance in advanced broadband access radios. This will further benefit our customers,” said William Aziz, President and CEO of SR Telecom.

About MTI

Microelectronics Technology Inc. (MTI) is a high tech company specialized in wireless communication product development, manufacturing and global sales for more than 20 years. Based on the core competence in microwave and RF technology, MTI has established leading position in the fields of microwave radios, satellite ODUs and receivers, mobile base station components and broadband wireless access products. With the excellent track records, MTI has established long term partnership with world’s leading communication equipment providers.
